Linea Casegood Collection

Casegoods: Desks & Credenzas

Showroom #387

Barcelona-based Mario Ruiz designed a collection that brings a clean, simple aesthetic coupled with a range of textures and colorations. The variety of material thicknesses with subtle offsets gives each piece precise detailing. A wide range of options are also critical: glass or extruded aluminum shelving, anodized hardware, leather, glass, and acrylic combine with dark, recessed bases to make each unit appear to be floating. Seven veneer options and multiple standard finishes, along with painted finishes, enable the designer to create a one-of-a-kind office environment.
